

Spin a Yarn

Simple mechanism for spinning raw materials first suggested by Mr. Evans in London, England. Visitors use a hand full of raw material and attach it to a clip. The clip is rotated rapidly by means of a simple, visitor operated, hand crank.

Designed and built by Joe Hastings and Exhibiteers Inc.

Client: Technorama Science Centre, Winterthur, Switzerland - Textile Exhibition

Millwork design, graphics and production by Technorama Science Centre and Bellprat & Associates
